**UKA TARSADIA UNIVERSITY**

## **Objective:**

A Seminar on “Career Guidance” has been conducted on 24th September 2019, at Manjula Auditorium CGPIT-UTU, Bardoli in order to spread literacy among the aspirants of various fields in Computer Engineering and Information Technology. The program objective was to let the students know about the various opportunities available for their career after graduation and help them to take the right decision for the same with prior knowledge.

## **Description about the Program:**

Seminars are an inherent part of UTU culture. Same way, this seminar was organized for the benefits of students of Computer Engineering and Information Technology fields. Given seminar was organized for pre-final year students to know about the current market scenario, what are the paths available after graduation, where and how they can focus to build their career etc. At UTU, we believe that ‘Success is not a destination, it is a path of a journey which begins from student life only’. From beginning of final year only, students interested in placement, started to get placed and those who are interested in further study; they start with their preparation as well some appeared in the same. This seminar was organized by final year students to share their experiences regarding same with pre-final year students and to motivate their fellow batch. The idea was proposed to the final year students of Computer Engineering and Information Technology fields by Head of Department of Computer Engineering, Dr. Devendra V. Thakor. So, foremost gratitude towards them for such sincere efforts and helping students to show right direction to plan their future.

The seminar started by welcoming heads of departments along with faculty members and pre-final year students. Final year students started giving presentations signifying the importance of the various opportunities available for the career after completion of their bachelor’s degree. Final year students put their efforts to enlighten pre-final year students with knowledge by covering various topics on career path available after graduation like, jobs in various fields, Master’s study, Government exams related to Government sector jobs etc. They started with the topic on, how to prepare for exams like GATE, GRE, IELTS, CAT for their master program, then after other final year students shared some tips and tricks to deal with such exams. Next, they talked about the various MNC companies, cracking their interviews, scholarships and lifestyle for abroad study was also highlighted. Students were also provided with the overview about the Government exams.

The sincere efforts of all the final year students to provide the precious information to their fellow batch allowing them to follow the right path was highly appreciated by all the faculty members, Head of departments and all the students present.

The entire program was coordinated by students and credits for management includes Harsh Bhatt and Jigar Patel with the support of the Faculty members and Head of Department of Computer Engineering as well as Information Technology at CGPIT-UTU.

## **Conclusion:**

In concluding remarks, sincere gratitude towards all who helped in making this seminar such a resounding success. First and foremost, hearty thankfulness to Head of Department of Computer Engineering and Information Technology for gracing such seminar idea for their students.

Next, thank all the distinguished speakers for delivering excellent presentations to make this seminar interesting and meaningful. The profound gratitude goes to our all faculty members of Department of Computer Engineering and Information Technology for their presence in the seminar and specially providing their students with the moral support and guidance.

A sincere approach of all the coordinators and volunteers who have been running around, doing a lot of things in the background and making the seminar a great success.

Finally, the wonderful students who have turned up in such great numbers to attend the seminar sincerely. The event was highly considered to be successful by all combine efforts.
